Configure forms, charts, and dashboards in model driven apps	Learn how configure forms, charts, and dashboards.	Jun 16, 2023	1 hr 5 min
Get started with model-driven apps in Power Apps	Model-driven app design is an approach that focuses on quickly adding components to your apps. These components include dashboards, forms, views, and charts. With no code, or very little, you can make apps that are simple or very complex. Unlike in canvas app development, where the designer has total control over the app layout, much of the layout in model-driven apps is determined by the components you add. In other words, the emphasis is more on quickly viewing your business data and making decisions than on intricate app design.	Jun 16, 2023	1 hr 14 min
How to build your first model-driven app with Dataverse	This module will focus on the building blocks of Dataverse and model-driven apps. These key components will help you build quick business apps in your organization.	Jun 16, 2023	28 min
